Subject: RE: quick check in on BERS task orders

Mike & Bob -

Thanks again for your patience and understanding as we work through making these hard choices about what we can afford to fund in our LUST cleanup Indian country budget this year.

After checking in with all the regions on both the new year FY16 LUST cleanup funding, and funds remaining on the BERS contract, I have confirmed that I have available for Region 5:

\$320,000 in new year FY16 LUST cleanup funds

- We recommend you spend these funds as follows: \$20,000 toward your SEEs, and \$300,000 on site assessment and cleanup. However, if based on your closer knowledge of these projects, you decide that you would prefer to spend these funds differently, that's fine. Just please let us know how you do decide to spend them.

-

Plus:

\$124,555.57 in funds that are already on the BERS contract for Tower Standard (of which the active task orders all closed at the end of the period of performance which was April 18th, so a new task order will need to be put in place.)

Plus:

Up to \$33,740.32 in funds that are already on the BERS contract but were left over from closed task orders from other Region 5 sites (Big Stone, Boivin, Hub Oil, North Mobil Oil, Preston's and Rosebush.) This \$33K+ you can reallocate to whichever sites you want BERS to work on, it does not need to be spent on those sites from which it was left over. So – for example, if you want to add the \$33K+ to the \$124K for Tower Standard, you could do that, or you could spend it on a different site that you want to get work done on this year.

-
All together that gives you guys \$478,295.57 in LUST cleanup funds to use in Indian country this year.

Of course, if you decide this is more money than you need, the other regions would be happy to take it from you. :)

Recertified funds:

In addition, if it is possible that Region 5 has any closed vehicles (contracts or grants) that had LUST money on them when they closed, and they are now in the Recertification database, please work with Tamiko to get that money recertified, so we can see if you can add that as well to fund your tribal LUST cleanup work this year.

Please let me know if you want to discuss this further, or if you're OK moving forward to work with Tamiko & Ray to get these funds made available and get them obligated into vehicles.

We do need to make sure all these funds are obligated before September 30, or they will be swept by OCFO.

We also need to make sure that whichever sites you choose to do site-specific work for that we check to see whether you need new action memo ceilings before adding money to those sites.

Thanks! - Carolyn

Subject: RE: quick check in on BERS task orders

Hi Carolyn,

I spoke to Ray this morning about the task order funds. When he returns to the office on Tuesday, we will go through the list and I can verify whether the task order work is complete for the sites listed below. As of now, I believe that the work was completed for each, with some funds remaining.

I very much appreciate your and Ray's efforts to allocate these funds to future work.

Enjoy the holiday weekend.

Bob

Subject: quick check in on BERS task orders

Bob – Just left you a voice mail message, but wanted to follow with this email on a quick question.

Ray & I are working on cleaning up the closed task orders under BERS' past period of performance that ended on April 18th, and wanted to do a final check with you before we sweep the old money.

The following task orders for past work ended with some balances of money left over, and we would to make sure that the old money is not free and clear for us to allocate to this year's task orders:

Big Stone	\$4.56	
Boivin	\$5,455.85	
Hub Oil	\$19,357.58	
North Mobil Oil	\$7.69	
Preston's	\$5,459.89	
Rosebush	\$3,454.75	
	\$24,825.68	Total to be reallocated to new projects
 Tower Standard	 \$124,555.25	 Keep with Tower Standard for ongoing work

Does that look right to you?

If so, could you let us know as soon as possible?

Thanks!
